PAGE Congratulates Founding Member EQT Corp.'s Net Zero Achievement

WASHINGTON, D.C. (October 31, 2024) – Today, the [Partnership to Address Global Emissions](#) (PAGE) issued the below statement in response to EQT Corp. announcing that it has reached net zero scope 1 and scope 2 greenhouse gas (“GHG”) emissions across its legacy operations ahead of its 2025 goal.

PAGE congratulates founding member EQT Corp. on becoming the first traditional energy company of scale to achieve net zero Scope 1 and Scope 2 emissions across legacy operations.

Reducing emissions associated with natural gas production and transport is critical to ensuring the fuel can continue to play a leading role in lowering power sector and industrial emissions. PAGE members are committed to continuing their industry leadership on emissions reductions across the natural gas value chain, building on the steps they’ve already taken to establish U.S. natural gas as a key tool for global decarbonization.

About PAGE

The Partnership to Address Global Emissions (PAGE) is a coalition of responsible energy companies, allied NGOs, labor unions and leading climate advocates dedicated to reducing global emissions by promoting U.S. policies that protect the climate, strengthen the economy, lower energy costs and bolster energy security through the production and export of cleaner natural gas.
